

Fact Sheet: Integrity and values

PM Albanese leap-frogged Morrison on an integrity platform as Morrison was proving the adage, "Oppositions don't win elections, governments lose them".

Morrison had no positive values but his degradation of integrity was condemned around the world. Albanese defined it narrowly as anti-corruption which it isn't as when he brought Professor Glyn Davis in to head up his Department on a wider remit.

The moral stain has been strongly documented but ignored by an Albanese who used to deny he was from Sicily, as if that mattered. Treasurer Jim Chalmers has strong deviant tendencies as explained.

Upfront there are three integrity issues of monumental significance inter alia where the Albanese Government has not met its potential:

1. Long-term climate futures where not following a determined mitigation path to 2030, 2040 and 2050 will harm future generations here, in the Islands and around the world
2. Similar continuance of distorted economic and infrastructure planning and budgeting, where reduced service standards and rising debt are features, will damage current and future generations' ability to manage their world even if we pass on the substandard one compared with what we could have done
3. The moral stain of the LNP ethical catastrophe has been only partially addressed and not at all in terms of maximising the value of government, redressing corruption and waste, and expiating IP theft and the underpinning cruelty imposed by the LNP as well as by the Rail Union and Labor itself.

Climate and economic missed opportunities are addressed in other Fact Sheets where the connections between

- international betrayals
- backroom relations with carbon corporates and heavy carbon subsidies
- local mitigation programs as in Newcastle's post-carbon world-best revival being replicated through the NSIP template
- "community resilience" as an integral companion to PPEs, clinics and wonderful hospitals, including feedback from health campaigns into lower system costs – the Murray/Gibbons template offered free to Albanese but, as with others, no responsiveness
- projects that would reduce debt, congestion, health and living costs pressures and regional/sectoral hardship which governments are suppressing, and
- upcoming economic statement, business summit and budget as constrained by a continuation of Frydenberg distortions

are explained.

So far the Government has refused to consider my "positive changes" in repairing integrity, with the PM's promise "to change":

- the identification of pre-ICAC corruption,
- means of expiation of the effects of cruel and malevolent corruption, and

Benefits of reading

- How our health and economic problems can be reversed from the Morrison/Frydenberg crises into an Albanese storybook
- How to reduce covid risks in our suburbs and regions
- How to reward efforts and adopt great ideas, saving future generations
- What is the truth about Stephen Kennedy, the Coalition's clodhopper thumbscrew but Jim's friend

- means of avoiding further such instances of corruption including reversing the dominant "slam the door closed".

The theft of all or any of a citizen's property without cause, such as plagiarism of published, protected ideas, and denial of promised relief such as bushfire and flood reconstruction, are corrupt in intent and effect, and non-return of the property is also corrupt including with the "shameful tolerance" by ministers and Parliamentarians.

Port-barrelling in a pre-election timeframe is traditional; but the gross level and politicisation of Morrison and Berejiklian have been regarded as corrupt in intent. The major source in Australia on systemic corruption appears to be this author's <https://www.kobo.com/au/en/ebook/righteous-blame> where "malevolence" is frequently used as well as integrity and corruption.

The fact is, Albanese's reference to an increasing state of corruption is the malevolent breakdown of "due diligence" and "the rule of law" as analysed in **RIGHTEOUS BLAME** and other books as listed at Kobo. The problems from Morrison are widely regarded as "challenging". The situation is much worse than that BUT the solutions are in the websites and books.

CORRUPT	CRUEL	FASCIST
<ul style="list-style-type: none"> ~ Appointment of known compliant corrupters ~ Steal from a citizen ~ Fail to recover money corruptly spent by Morrison & cabals ~ Continue Morrison corruption without explanation, includes corruption by associated union 	<ul style="list-style-type: none"> ~ Know of critical illness and urgent hospitalisation of a principal victim but worsen situation ~ Promise relief but force victims to continue with legal action to reverse Morrison policy ~ Extend "waste" actions to valid interests ~ Deny the community solutions & relief including OECD protocols 	<ul style="list-style-type: none"> ~ Know of critical family & personal needs but ignore them, to grievous cost ~ Deny intergenerational equity - the unborn - through careful structuring of debt and liabilities instead of negligent actions and ignored "repairs"

Already major economic stimulus parameters have been compromised: I offered free access but locked them off under duress:

- faster trains, regional population and employment balances,
- specific transport situations such as to the east, north, northwest, west, southwest and southeast of Sydney – political statements about carbon and congestion costs in cities are cant as they **promote projects that worsen congestion & carbon** and suppress better options (these are supposed to lie within the PM's skills set)
- broad nation-building initiatives across all three levels of government.

There is a demonstrable loss of

- efficiencies in meeting climate and natural events, migration and population, existing infrastructure defects, changes in locations & frequency of natural crises and living security
- community PR events including thank-you to first responders and frontline staff in the Murray
- famous proposal for First Nations fire risk reduction program
- transit innovations, reduced congestion, lower suburban living costs including asthma and stress, and
- Humanitarian causes specified here and at sydneyimprovementpolitics.com, such as Save the Children, brain tumour and health, Police Legacy and my long-held ambition for a national institute to remember Forgotten Heroes.

Labor knew of my circumstances but Chalmers gave the clear impression he enjoyed causing me pain:

Long-term homelessness and destitution led to stress and dietary imbalance symptoms which I did not recognise, I eventually collapsed and was rushed to hospital A&E and med wards for 10 days of treatment and tests re critical diabetes, anaemia and suppurating cellulitis (8 days of intravenous drips for a total of 62 days on antibiotics).

The ALP was informed of these general and specific issues and ignored them, showing a callous disregard for human values and instead a fixation on shared values with the cretins in the LNP.
