

## *Critical contextual issues of the Albanese Integrity Reform Government in its first 10 weeks of BreakThrough Potential*

The ALP Rudd/Gillard Government was defeated in 2013 by a banshee Coalition leader named Tony Abbott. It rocketed through him and another leader before the last and least Scott Morrison was defeated on 21 May 2022 by the ALP's Albanese Integrity Government. The Coalition left a mountain of cruelty, incompetence and sheer arrogant rudeness across Australia and the World, and Anthony Albanese showed a surprisingly high aptitude for foreign affairs. Domestically he has continued his previous Ministerial record of avoider of "due diligence" or proper planning protocols, particularly with a patchy application of "integrity" and anti-corruption actions.

That previous history led Albanese to volunteer, "I know I have to change". He had become known for backroom deals with dark blue suits, some of which persist as deleterious to national productivity. Not least was an impractical High Speed Train model that would have taken 40 years of preparation and construction and be more risky and less cost effective than an ignored option, which was characteristic of subsequent national and state governments under his iA protocols. Another is a container terminal at Moorebank which is an impediment to the regional re-balancing of population and employment and thus the reduction of structural congestion and high toll costs and living expenses for families and workers, and with Kennedy's damage, threats to the ports and logistics sustainability in the eastern seabord of Australia.

The most important parts of the context are

- Smooth continuance of the "Save Sydney" theme I have been developing since Labor's catastrophic volte face under lemma – I started with four websites then 4 books, this being the 4<sup>th</sup>. A great deal of potential public benefit was generated (and suppressed) which is my career characteristic but my motive was to drag the Coalition Governments in NSW then in Canberra into the open once the "NSW Disease" was taken there by PMs Turnbull and Morrison. Labor has continued the budgetary disintegration of Frydenberg/Kennedy
- Serial plagiarism of my work, which is of national significance, primarily by the LNP but also RTBU, Fairfax and now Labor:

Frydenberg understandably refused to meet his obligations as he had turgid ethics and a vicious meanness; but Labor's Chalmers has continued in the same historically-malevolent direction under the thrall of

*Frydenberg's thumbscrew, Stephen Kennedy. He is the Ph D in health economics who wrecked every element of the response to coronavirus as well as the economy, demographics and environmental present and future of Western Sydney, the largest regional economy in Australia. Kennedy is a disgrace who has been given the key to Labor's vaults of secrets.*

*How does climate get caught up in governance?*

The lengthening conflict over integrity and suppression of superior proposals and notions is having real consequences which are at odds with the ALP's election promises and "true Labor values". "Value propositions" have been suppressed for what can only be for reasons of malice and cruelty.

Various interest groups are dismayed at the continuation of Morrison-like thinking such as

- cutting PPEs and essential community facilities but maintaining high carbon subsidies
- defence liabilities contrary to Keating's clear exposition of more appropriate Defence and foreign relations policies
- under-funding of carbon mitigation technologies (alternative employment in resource and other regions), without an apparent "plan"
- continuing citizen and civil rights abuses
- risky if not dishonest statements to Pacific and Timor Straight neighbours about
- Achievement of actual outcomes that will ease their circumstances ("Canut complex")

The obvious risks and disrepute of continuing Kennedy at \$1 million p.a. after his shameful record of mistakes, distortions and abuses has been documented – amounts to "a culture conducive to corruption", as does not ameliorating Coalition abuses of Gibbons with Labor's appeasement.

*Albanese is the first Labor Leader in history to silently ignore the theft of a citizen's health, family and survival. This is an indelible stain on his integrity until he expiates the damages.*

We see that in Trump and Johnson as with Morrison and his cohorts including Dutton's grievous breaches against human rights and Frydenberg's destruction of "Rule of Law" or "due diligence" in rorts and "gifting" to cronies including Harvey Norman's retention of overpaid Job Keeper subsidies and appointments to statutory boards.

Where that happens the mastheads and individuals in the Fourth Estate sometimes mention the offences or more usually ignore them with much the same to say of universities and institutes. The exceptions usually exhibit silo attitudes, so partial viewpoints.

Sometimes individuals and institutes make decisions for their own purposes which have externality impacts on society and individuals. Some have remedies in law such as rare writs of mandamus and formal interventions based on alleged avoidance of environmental obligations in project impact statements. Citizens can and do fight for what is right such as the March on Canberra and the current website.

Generally, however, individuals cannot sue PMs and Premiers as deliberate court tactics will bankrupt them. In discussion with Premier Baird's lawyers, it was agreed that "moral and political suasion" was an avenue available to me in the context of his explicit theft of my "commercial in confidence" and copyrighted Northern Beaches Bus Rapid Transit scheme. That was extended during his and Berejiklian's rampage against me.

There is obvious reluctance in the Albanese Government (which promised "integrity" but delivered disorganised differential standards) to observe fairness principles, the "rule of law", in the principle of perpetual succession between vertical generations of governments. That is objectionable and even enraging as the Labor Party was silent as its nominal opponents traduced my rights and life; and then Labor extended the Morrison/Frydenberg/Kennedy malice and cruelty while still rewarding Kennedy with \$1 million as year for consistently abysmal performance.

The grossest case of IP theft in Australian history is being worsened by this new government which has ignored the “value propositions” inherent in my pre-formulated solution sets as summarised below. Media and industry folk remain in their silos.

The dogmatic refusal to “repair” past mistakes in line with OECD and Treasury-type protocols is typical of the LNP as they are bound by secret deals; but Albanese’s and Chalmer’s attitudes remain as impediments to productivity improvement and debt containment.

This author appears to be the only expert economist and political scientist in the nation fighting for restoration of “due diligence”, “rule of law” and intergenerational equity. Having experienced many ad hominem attacks, this is a forthright rejoinder. Progress in the 10 weeks has been uneven through to extremely worrying. This is how I’ve put the associated risks, on the website:

Gibbons’ case is historically threatening because of severity of economic, personal and political consequences & risks  
Gibbons showed Frydenberg & Kennedy the risks to their tenure from resulting erraticism & controversy over damage to victims, communities, economic outcomes & reputation of data and operations

Dumb direction at start	Main consequences	Implications
Not learn from Morrison & Frydenberg Not eliminate cronyism	Make same mistakes Kill ability “to plan” Misallocate resources cf OECD	Cause community anger at failed anti-corruption Fail to meet carbon targets, incur penalty taxes Antagonise central agencies & authorities
Make enemies Not recover illegitimate “gifts” Alienate best ideas	Quarantined priority areas e.g. Frydenberg SME stimulus Be stymied at key points Δ	Lose cost-effectiveness with sadly scarce resources Increase debt and waste unnecessarily Be ridiculed for failing to meet key KPIs
Break promises Defer to point of denial	Sterilise potential reserve supporters Alienate Labor swingers	Fail to achieve legislative program Lose confidence of Party Room & business/union actors
Not re-skill executive Not use DPM&S to improve Public Service	Make same mistakes Kill ability “to plan” Misallocate resources cf OECD	Not use central agencies to improve network effectiveness Ministers make mistakes, threaten tenure
Not allocate resources carefully Not implement 360° QA cycles	Make same mistakes Kill ability “to plan” Misallocate resources cf OECD	Lose cost-effectiveness with sadly scarce resources Increase debt and waste unnecessarily Be ridiculed in international forums
Not measure & adjust / correct all KPI areas over time	Miss time signals on gaps & opportunities Fail on key KPIs	Lose cost-effectiveness with sadly scarce resources Increase debt and waste unnecessarily Be ridiculed by central authorities & media

- Already major economic stimulus parameters have been compromised: he offered free access but locked them off under duress
- faster trains, regional population and employment balances,
- specific transport situations such as to the east, north, northwest, west, southwest and southeast of Sydney – political statements about carbon and congestion costs in cities are cant as they **promote projects that worsen congestion & carbon** and suppress better options (these are supposed to lie within the PM’s skills set)
- Demonstrable loss of
  - nation building and efficiencies in meeting climate and natural events, migration and population, existing infrastructure defects, changes in locations & frequency of natural crises and living security
  - community PR events including thank-you to first responders and frontline staff in the Murray
  - famous proposal for First Nations fire risk reduction program
  - transit innovations, reduced congestion
  - lower living and energy costs, and
  - Humanitarian causes specified here and at [sydneyimprovementpolitics.com](http://sydneyimprovementpolitics.com).

Baird and Berejiklian had forced me into homelessness in 2013 after a previous 5 years of poverty and stress. My mentors were two of Sydney’s leading “experts” in planning and in finance & banking, both were astonished at faux-Christian Baird’s malevolence.

*Long-term homelessness and destitution led to stress and dietary imbalance symptoms which I did not recognise, I eventually collapsed and was rushed to hospital A&E and med wards for 10 days of treatment and tests re critical diabetes, anaemia and suppurating cellulitis (8 days of intravenous drips for a total of 62 days on antibiotics).*

*The ALP was informed of these general and specific issues and ignored them, showing a callous disregard for human values and instead a fixation on shared values with the cretins in the LNP.*

*The cellulitis infection required further medical attention and remains “visible” 6 months after the initial symptoms on 17 January.*

*Treasurer Chalmers ignored the advices and knowingly increased the stress on me by suppressing my concerns and frustrating my attempts to recover my health and life, “black hole”.*

In a democratic society there is always a risk that ministers and central agencies will move from crisp lines of accountability and ethics into something they do to others but are themselves impervious to. However the honeymoon period of a reform government must not be dithered away, it is time to make a crisp break with the malevolence of Morrison/Frydenberg and resume nation-building in line with my submissions to PM Albanese and Chalmers.
